

Fall Quarter Senior Project Panel Presentation Guidelines

Overview:

- Total time allotted your team – 15 to 20 minutes
- Use a portion of that time to present relevant topics about your project
- Expect to answer questions during and after your presentation
- Take notes of the questions asked – more than likely those questions will expose inconsistencies and incompleteness with your project, use these weaknesses as a guide for improving your project

Relevant Topics to Cover:

- Project problem statement – should be customer oriented and include a subtext that describes the direction your team is taking to help address/solve the problem
- Address the three questions listed below for the following courses: 371 (Requirements), 372 (Project Management), and 477 (Architecture)
 1. What specific topics out of CSSE3XX/CSSE4XX have you utilized?
 2. Of the topics listed in response to Question #1, how have you utilized/adapted it to your specific project?
 3. What topics out of CSSE3XX/CSSE4XX have you not utilized? Provide good justification for why you have not utilized them
- To get started, create a checklist of topics for each of these three courses. Base your checklist on each course's learning objectives

Format:

- PowerPoint slides
- Follow good slide design principles
- Make the presentation 10 to 12 minutes long
- You must practice delivering it multiple times
- Trade off speakers and make those tradeoffs go smoothly, so smoothly that the audience doesn't even notice that it happened
