Dr. Mohan's Senior Project Problem Statement

- Should have a problem statement agreed to by your client by midterm
- Should be updated with changes at end of term
- Normal format for the problem statement:
    - To be about 2-3 pages in length
    - Include a *short list* of:
        - key features
        - quality attributes
        - other pertinent info the client agrees to, e.g., how the system relates to or replaces some existing system
    - The Function Form Economy Time model used in 333 would be a good template
